

Lean Enterprise

Based on the following reference:

Auf dem Weg zum perfekten Unternehmen
(Lean Thinking)

James P. Womack & Daniel T. Jones

Productive Savings generate Shareholders Value
Productive Savings generate Shareholders Value

What is a Lean Enterprise?

The Product / service is:

The Lean Thinking Approach

1

Pulled from the market
Pulled from the market

And not pushed into the market

Market
Driven

2

Continuous treatment
of all **flows of**
operations soft- &
hardware along the
Value Creating Chain

The only way to solve
problems in terms of
quality and
competitiveness is:
**TO REDUCE THE
WORKING CYCLES
for Hard- & Software**

That is the reason why,
our Valuable Customers
want to deal with less
interfaces (time & space)

No double Work

No double Margin

No multiple Responsibilities

New Business World Approach

Pull from the market Pull from the market

Contributing to the lowest global cost for each MWH to be injected into the Electrical Power Grid on a Win-Win basis.

Lean
Thinking
Approach

Also valid for
sectors other than
Power Generation

Our Valuable Customers
expect this from us

Mission Statement

Contributing to the lowest global cost for each MWH to be injected into the Electrical Power Grid on a Win-Win basis.

Don't hesitate to contact us

Thank you

for

your

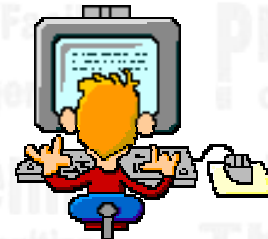

kind

attention
